

MEMORANDUM

Date: January 26, 2012
To: Water Right File 65-13410
From: cpalmer
Re: Licensing Memo

An assignment of permit was submitted on 6/1999 assigning this right to Buddie Munday only. The assignment is not process-able because of the assignor is Buddie Munday only--the other right holder, Robert Haney, must have signed the assignment. An ownership will be mailed to right holder at licensing.

The main reservoir is the only impoundment that is authorized under this right. The two ponds that were found during the field exam cause the volume to exceed 5 af. In addition, those ponds are so small that it appears that they may fill in less than 24 hours and have no impact or require a new permit.

The right holder did not develop a reservoir that is required to be on the dam safety radar so no further actions are required from the right holder regarding his agreement with the protestant. Note that a copy of this license will be sent to the protestants to inform them of the licensure...it appears they are still neighbors.

This right will be licensed pursuant to the field examiners findings.
