Gib,

Attached is an application to lease King Hill's 70 cfs water right no. 37-21595 to the Water Supply Bank, with two attachments to be submitted with the application.

If the King Hill Board has already determined by resolution to lease the water right to the Water Supply Bank, please have the King Hill President sign the application and submit it with the attachments to the address at the bottom of the application.

If the King Hill Board has not made such a determination, please place the question on the agenda of the Board's next meeting, and if they adopt a resolution to lease the water right to the Board, please have the President then sign and submit it.

Note that there is a \$250 fee that must be submitted with the application. Note also that the maximum period of time the water right may be leased to the Water Supply Bank is 5 years. After 5 years, the right must be leased to the Bank again, with submission of another fee.

Please contact me with questions.

Dan
