Emalee,

RE: Change of Ownership: 29-00578A

The A and B rights have the same point of diversion (POD) and we submitted the deed conveying the POD to BLM. For the B right, the Place of Use (POU) is at the POD so we are good! Thanks. For the A right both POUs describe BLM land that has always been in federal ownership, therefore there is no deed for those two QQs. By acquiring the POD, BLM now has unity of title between the POD and POUs. Attached is a Master Title Plat (MTP) which is the official record of title for United States property. I colored the BLM land yellow so that you wouldn't have to try interpreting the annotations on the plat. The dotted areas within the yellow shading are lands that have been reacquired by BLM (eg. The POD location). The non-dotted areas within the yellow shading have always been in federal ownership (eg. The POUs under 29-00578A). I'm sorry, we should have submitted the MTP with the change of ownership.

Fred,

I am looking at the ownership change documents that you submitted for water rights 29-578A and 29-578B. The deed you submitted (Instrument #167401) matches 29-578B only.

When I look at tax lot data, it appears that BLM owns the SWNE and NWSW of Section 33, T8S, R41E. If you could provide a copy of the deeds which cover those two QQs, we can process the ownership change for 29-578A.

Thanks!
