

MEMORANDUM

Date: January 12, 2012
To: Water Right File 47-8276
From: cpalmer
Re: Licensing Memo

This right is for one on-stream pond. There are no overlapping rights concerning the PD and POU. I measured the pond to be ~0.02 acres in surface. The recommendation to license this right for 0.20 af means that the pond is 10ft deep on average. I believe that this is not unreasonable and will license as recommended.

The source should be clarified to be an unnamed stream tributary to sink rather than spring tributary to sink. The pond is obviously located within the unnamed streams channel. An upstream water right has the source as unnamed stream tributary to sinks as well.
