RE: Beneficial Use Field Report for Permit 71-10934

Dear Mr. Scanlan,

The Department received a beneficial use field examination report for 71-10934 and an acceptable proof of beneficial use statement for permit 71-10934. However, after reviewing the field examination report, additional information is needed.

The report does not address whether water appropriated under permit 71-10934 provides an additional increment of beneficial use that is in addition to that already provided under existing water rights. The recommended diversion rate and volume associated with the permit should be based not only on field exam measurements of source water flows, but on a review of the extent of beneficial use developed. Beneficial Use Examination rule IDAPA 37.03.02.035.01.I provides:

I. Information shall be submitted concerning the beneficial use that has been made of the water unless the purpose of use is for irrigation. For example, for stockwater use, the number and type of stock watered shall be provided. Similar indications of the extent of beneficial use shall be provided for all other non-irrigation uses. (7-1-93)

For your convenience, I am enclosing a copy of an example review that was conducted for water rights 47-7659 and 47-7731.

Please submit the additional information by **February 24, 2012**. Please feel free to contact me if you have any questions.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Craig L. Saxton', is written over the typed name.

Craig L. Saxton

Water Rights Supervisor
