Dear Mr. Ward:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right application. A copy of the application is enclosed for your reference. Please review the application, complete the enclosed recommendation form, and submit it to this office within 21 days.

The Department can publish notice of the application as soon as the initial review is completed. Therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of this application, you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication.

The applications 63-32562 & 63-32608 appear to describe the same ditch used for several older irrigation rights. The unnamed drain flows into the Ross East End Drain, which is presumably tributary to the Boise River. However, the Ross East End Drain might be tributary to the Snake River based on topographic maps. The tributary issue can be clarified as application processing continues.

Please contact Steve Lester at this office if you need more information.

Sincerely,

Sherry Borgeman
Administrative Assistant

Re: Permit Application Nos. 02-10460, 02-10461 and 10462

Dear Kay:

This responds to your letter dated November 28, 2011, concerning the permit applications referenced above. In response to your inquiry about how the applications would provide an additional increment of beneficial use, each of the applications seeks to fill a gap in the diversion rate needed and actually used to accomplish the irrigation beneficial use authorized by the primary decreed rights for the lands identified in the applications at issue here. Our review of the underlying rights during the SRBA adjudication process revealed that these licensed-based rights were either in error and/or that system improvements had been made that increased the diversion rate available to accomplish the authorized irrigation beneficial use after the licenses were issued. The binding effect of licenses in the adjudication, the 1971 mandatory permit date and the unavailability of an enlargement right under I.C. § 42-1426 for a diversion rate increase foreclosed any opportunity to align the original water rights with the on-the-ground manner in which the irrigation beneficial use is accomplished. Accordingly, the applicants need to obtain new water rights to cover their peak irrigation diversions.

Concerning Basin Land Project's absence from the Idaho Secretary of State records, this is because the Basin Land Project is a tenancy in common, which is not legally required to register with the Secretary of State to exist. The tenancy in common agreement that creates the Basin Land Project is attached for your reference.

RE: Applications for Permit Nos. 02-10460 (A-D Cattle Co. Inc.), 02-10461 (Allen Noble Farms) and 02-10462 (Basin Land Project)

Dear Applicants:

Your recent applications for permit regarding the Snake River for irrigation purposes are being reviewed. To assist this office in completing the initial processing steps, please submit additional information required by I. C. § 42-203A(5)(a-e) for "large diversion projects". This requirement includes the following items discussed in Water Appropriation Rule 40, Rule Subsections 040.05c through 040.05g:

1. effect on existing water rights
2. sufficiency of water supply
3. good faith, delay or speculative purposes
4. financial resources
5. local public interest.

In this situation, only the following item needs to be addressed. Since these applications are for adding a marginal rate of flow to existing water rights, we would request that you provide an explanation of how water proposed to be diverted under these applications would provide an additional increment of beneficial use of water that is in the local public interest.

We also notice that Application for Permit 02-10462 may need to be assigned to an entity that is authorized to conduct business in Idaho. We have checked the Secretary of State's website and do not find that "Basin Land Project" has registered with them. It would be helpful if this applicant was qualified to do business in Idaho since they will be involved with other water user's rights. We have enclosed an "Assignment of Application for Permit" form in case you wish to assign the application to a party that is authorized to do business by the Secretary of State. There is no fee for submittal of this form.

Please submit the requested information to allow final evaluation of your application to be completed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. Your response or a request for more time to seek the information must be received within the next ninety (90) days. The application will be voided without a timely written reply.

IDWR rules, forms and other information are available on the Internet at www.idwr.idaho.gov. Please feel free to contact me at (208)334-2190 if you have questions in regard to this request. Thank you for your attention to these matters.

Sincerely,
