Pete,

Vicki Luna's water right, which I believe is Joe's place, authorizes 8 inches of water to be diverted from the drain from March 1 to November 15 for irrigation. No diversion is authorized for the winter under the Luna right. Diversion of 100 inches during the winter is authorized for Waterfowl Improvement Association. Diversion of 60 inches all year is authorized for FDF Inc.

Boards being placed across the unnamed stream channel in the winter to direct water into the ditch carrying water to FDF Inc. and/or Waterfowl Improvement Association land appears to be consistent with their water rights.

I'm not exactly sure which parcel of land you are working. If the parcel you are on is (or was) in the name of Michael Naeve, I show Farmers Cooperative Ditch Co. delivering water in that area for irrigation during the irrigation season, but no private water rights to divert from the unnamed drain for any purpose.

Sincerely,

Shelley Keen

Thanks so much for your help. The way i under stand it is me and joe both have water rights year round so the people taking are boards out of the diversion dam north of the hwy can get in trouble for stoping are water supply? ?one more thing does it say how much water were intitled to for each person. Thank you so much for your time and troubles you have been a big help.

Vicki,

Sorry for taking so long to get back to you and Joe.

I've attached a file containing printouts of four water rights. Right 63-4530B authorizes FDF Inc. to divert water from the unnamed drain for irrigation, wildlife, and wildlife storage on land between the highway and the Boise River south of your property. Right 63-28289 authorizes you to divert water from the unnamed drain to irrigate 8.1 acres north of the highway. Right 63-30224 authorizes Waterfowl Improvement Association to divert water from two unnamed drains for wildlife and stockwater purposes on land between the highway and the river west of the FDF Inc. right. Right 63-10608 authorizes Waterfowl Improvement Association to store water for wildlife purposes. Rights 63-4350B, 63-28289, and 63-30224 all authorize diversion of water from the drain in the SWSE of Section 35, Township 5 North, Range 4 West, which is on Gibson land just north of your property. Rights 63-4350B and 63-30224 both authorize the diversion of water throughout the year, including during the winter.

Please review the water rights carefully. If you see activity inconsistent with the water rights, or if you have other concerns, please write or email a detailed description to IDWR employees John Westra (john.westra@idwr.idaho.gov) or Rob Whitney (rob.whitney@idwr.idaho.gov). Their address Idaho Dept. of Water Resources, 2735 Airport Way, Boise, ID, 83705.

I've sent a copy of this email to Pete O'dell because he also at requested this information.

Sincerely,

Shelley Keen
