RE: Water Right Permit No. 65-13986

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

_____ **Point(s) of Diversion**

 X **Place(s) of Use**

_____ **Other**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at (208)287-4920.

Sincerely, 
Sandy Hemenway
Sr. Water Resource Agent

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, GARY SPACKMAN, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 65-13986 with the following:

CONDITIONS OF APPROVAL

1. Diversion and use of water with a temperature greater than 85 degrees Fahrenheit is not authorized under this right.
2. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
3. After specific notification by the Department, the right holder shall install a totalizing flow meter to measure the amount of water diverted and shall annually report the amount of water diverted to the Department as directed.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.
5. Rights 65-13986 and 65-1979 when combined shall not exceed a total diversion rate of 6.24 cfs at the field headgate, and 312.0 acres irrigation.

Witness my hand this _____ day of _____, 2012.
