Subject: 77-14238 Greenhurst (Fire Protection)

DOC002.pdf

Hi Kathy,

Please find attached a copy of an ArcMap aerial map. I have circled the 3 fire protection springs that were GPSd for their location, in section 26. The area that is outlined and gridded in pink is the "place of use" where the 2 cabins are located and the surrounding area designated for "fire protection" in section 25. The 2 black "X's" on the map do not relate to this fire protection water right, so please disregard these.

Please have Terry confirm that the pink gridded area that I have drawn is correct for "fire protection," and if it needs to be enlarged, have him take a sharpie and draw on the map and resend it. I will then update the shape. If no changes are required and the shape is ok with Terry, just send me an email approving it.

An amendment is required for this water right, since the location for the quarter-quarter is different on the Permit from what was found during the field exam. Mr. Guess probably had a difficult time determining the actual location from the old topo maps that were the only thing available at the time of him filing for the permit.

I just talked to Terry, and will mail you a hard copy and a self-addressed stamped envelope, so you can send any corrections directly back to me.

Once I hear back from you, I will send out the amendment for this water right, and you will need to sign it and the amendment for water right 77-14235, along with \$100 for each amendment (\$200 total).

Thanks,

Sandy Hemenway
