Re: Data correction to water right.

Boyd Foster and his brother visited the office today to determine whether an error was made in the processing of the permit assignment that created permit no. 24-7494C. Base right 25-7494 was originally split into rights 25-7494A and B through an assignment of permit. The rights were later recombined into water right 25-7494C through another assignment. The place of use, diversion rate, and point of diversion associated with part B were not included in part C after the two rights were recombined. This has been corrected on the database (see comments associated with 25-7494C).

A proof report of the right with the corrected data was sent to the owner.
