11. Application Explanation

Applicants propose a higher diversion rate (0.04 cfs/acre) to allow irrigation to be accomplished during limited times when the church facility is not in use. Currently, 4.5 acres in the SESE are authorized for supplemental ground water irrigation at 0.10 cfs (0.022 cfs/acre) under water right 63-33478 per approved transfer No. 76383.

Of the 4.5 acres, 1.3 are overlapped by water right 63-10142 that allows diversion of 0.12 cfs (0.09 cfs/acre) for irrigation use. This application seeks an additional 0.06 cfs (0.018 cfs/acre) diversion rate for the 3.2 acre portion of the 4.5 acre area that is not overlapped by 63-10142. Total annual diversion volume for irrigation of the 4.5 SESE acres will be limited to 20.3 afa when combined with water rights 63-33478 and 63-10142.

Additional supplemental ground water irrigation has also been proposed on 1.5 acres in the NESE at 0.06 cfs (0.04 cfs/ac). These acres are currently authorized for irrigation from surface water only.

The proposed well has been authorized for drilling under approved transfer 76383. The well will also be drilled as a replacement well under 63-10142. The two wells currently authorized under 63-10142 will be abandoned following successful completion of a new well.

Water bearing zone to be appropriated is from 200 to 500 feet.
