RE: Exam for 65-23140

Date: October 18, 2011

.....

I reviewed this exam for licensing but ran into a problem when it came to the diversion points. Sherry could not confirm the p/d's in office so Vicky went out and GPS'd the wells. Vicky's notes say that her GPS was not working well that day. I pulled in the GPS layer that contains wells GPS'd by DEQ and found that they have located all 3 wells for this Subdivision within the NWSE, Sec. 1, 6N, 2W. Do we want to use the points identified by DEQ for the licensing of this right? If we do it will require the permit be amended to correct the points of diversion.

I discussed with Rob and he said he would go out there and verify the location of these wells if we want him to (when he is in that area, will not make a special trip). He says that the DEQ uses hand held devices like we do so their points are as accurate as ones done by our office. I thought I would like your input before asking Rob to verify the location for us. Let me know. Thanks..

Kay

Let's license per gps data from DEQ based on Rob's comments. With amendment & possible response to license when issued, this provides plenty of chance for owner to correct this if we are mistaken.
