RE: Permit 73-12039, 74-15579, and 75-14258

Dear Water Right Holder:

The Department of Water Resources (IDWR) is in the process of reviewing the above-mentioned permits for licensure. As part of the review, IDWR confirms that each condition of approval has been met during the development period. In the case of the above-mentioned permits, it is not apparent how the following condition of approval has been satisfied:

Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening requirements of the Idaho Department of Fish and Game.

At this time IDWR is giving you the opportunity to provide information that clarifies how the condition was met.

In addition, permit 75-14258 authorizes the storage of water for stock/wildlife uses. During the field examination performed by IDWR staff, the field examiner confirmed that a storage tank was on site and being used but did not report the size of the storage tank. Please provide the size of the tank to IDWR so the license can be issued as correctly as possible.

Please submit the requested information within 30 days. Pursuant to Section 42-219(6), Idaho Code, if the condition of approval on a permit is not complied with, we may issue an order voiding the permit. Thank you very much for your time and please contact me at (208) 287-4944 if you have any questions regarding this matter.

Sincerely,

Cherie Palmer, Sr. Water Resource Agent
Water Allocation Bureau
