Amendment? NO

* Both 74-15579 and 74-15463 list the source as Springs tributary to sinks; but 74-7027 lists Sagehen Flat Spring tributary to McDevitt Creek as the source. Based on info in the Application, DRB, & Field exam it appears that the Spring source is locally known as Sagehen Flat Spring and the trib. will remain sinks as recommended by FE.
 -confirm condition 029 has been met - fish screening not necessary
 ** Not subject to WD because the source Sinks.
