

MEMORANDUM

Date: December 22, 2011
To: Water Right File 74-15579
From: cpalmer
Re: Water District

Stipulated Agreegment Item 2(B)(3)c-Administration of New Water Rights discusses non-deminimus rights requiring lockable controlling works, measuring devices, and data loggers in order to provide the watermaster the data. In this case, this right will not need to be reported to a watermaster because the source sinks and is a deminimus use. The database will retain water district 74 in the water district field so the right can be identified in the future in case it does need to be administered by the water district.
