Ernest Carlson
State of Idaho
Water District 120
900 N Skyline Dr. Suite A
Idaho Falls, ID 83402

Dear Ernest Carlson,

SUBJECT: LICENSE #35-08062

In 1983 I was 29 years old and helping my Father farm when the linear irrigation system was installed on what we identified as field #16 N and #16 S. These two fields are the place of use for permit 35-8062. I started managing the farm in 1986. After examining the department's documents it appears an error was made during the licensing field exam, because only $\frac{1}{2}$ of the irrigated acres were identified. When the license was received by us in 1995 the mistake in total acres was unnoticed.

I have gathered the power records, copied the crop rotation from my farm journal, copied the original "application for permit" showing the requested acreage of 398, copied the "permit to appropriate water" showing the total acres to be 398, and provided a copy of the 1992 aerial photo as verification that the entire permitted place of use has been farmed continuously since 1983.

Based on this information, I am requesting the department amend license 35-8062 to include 390 acres for the 4.78 c/s measured during the licensing field exam. If the documentation I have provided is not sufficient, please contact me.

Sincerely,

Michael Schritter
Schritter Farms

cell # 243-1591.

Shelley:

Here is the documentation
Mr. Schritter has compiled
to support his request
for amending license 35-8062
to include more land.

Ernie.
