Nick, Per your letter dated January 3, 2008. I visited the FSA offices in Bingham and Power County. We could not locate the farm report for 1990. But Bingham county office did have a 1985 crop report showing the field in question as being irrigated that year. I also visited with Steve Howser of the Aberdeen Springfield Canal Company. The best he could come up with was a 1987 aerial photo showing that field as being irrigated. I also have my own personal records for the history of that field beginning with the year 1983. I would hope that these items along with what has already been received by you in response to Ernie Carlsen's letter of December 27 2006 will be sufficient. Please let me know and I can mail these items to you. Thank you Michael Schritter
