

MEMORANDUM

TO: Application for Permit 37-22667 File

FROM: Corey Skinner

DATE: December 21, 2011

SUBJECT: Permitted Uses

Application for Permit 37-22667 was originally filed to appropriate up to 0.09 cfs of groundwater for domestic and commercial uses. The actual use is associated with culinary use at the Soldier Mountain Ski Area. This use would more accurately be described as just commercial use, since the use does not fit the 42-111, IDAHO CODE, "domestic use" definition. The use does not qualify as a "part a" domestic use (no homes, organization camps, public campgrounds, or livestock). The use also does not qualify as a "part b" domestic use (flow rate greater than 0.04 cfs &/or daily volume greater than 2,500 gpd). In addition, the 11/30/2011 letter from the USFS (co applicant per assignment of application for permit) requests that domestic use not be recognized and a 12/15/2011 e-mail from Valley Entertainment Group (co applicant) also requests that domestic use not be permitted. For these reasons it is recommended that the domestic use listed on the Application for Permit not be listed as a use when Permit 37-22667 is approved.
