

MEMORANDUM

Date: December 14, 2011
To: Water Right File 37-21337
From: amerritt
Re: amendment of permit

This amendment is for the purpose of changing the points of diversion to two existing wells operated by The Valley Club Owners Association, Inc.

During review using GIS it was found that the subdivision associated with The Village Green at Valley Club Homeowners Association is comprised of common area and building envelope lots being sold off. Due to the limitations of irrigation use only on lots where homes are built and specifically not to provide irrigation water to common areas the permit is being associated with the building envelope lots only within the subdivision. Essentially only very small gardens or shrubs are authorized to be irrigated. This matter was discussed with the applicants attorney (Hillary Soltman) who recognized and agreed with this limitation. She agreed that the common area would not be irrigated.

The original reference to right 37-657B in the original permit have been updated to reflect the splitting of right 37-657B associating right 37-22657 with the subdivision.
