Re: Low Temperature Geothermal Water Right No. 47-7964 held by Twin Falls School District No. 411

Dear Mr. Young:

As I mentioned to you in my letter of July 15, 2002, Twin Falls School District No. 411 would like to proceed with development of its geothermal water right. In November of 1988 the District requested an extension of time. The Department declined action at that time because of the District's failure to sign the July 22, 1987 Agreement. While the District's request has been placed on hold for almost 14 years, another right holder, Pristine Springs, whose predecessor likewise did not sign the agreement, has proceeded to alter its system and withdraw substantially more water in the years 2000 and 2001 than previously. The District requests that the Department investigate why Pristine Springs has been permitted to move forward during the moratorium while the District has not. Further, the District requests that the Department address its request to sign the July 22, 1987 Agreement.

Finally, the District nominates Mr. Wiley Dobbs, Director of Maintenance and Operations for Twin Falls School District, to the Commission to be established by the Department.

Very truly yours,

Jacqueline Wakefield
