Hello Bill,

I believe the attached maps address the place of use ownership question for the Thompson Creek Mine transfer. Ken Gardner with the BLM is also available for questions. Ken's contact information is provided.

Thank you,
Scott

Scott,

Please find attached additional maps showing the tailings area property lines. This map was put together by Ken Gardner BLM Challis Field Office his number is (208)879-6210. He is willing to entertain any questions that IDWR might have about the property boundaries.

Thanks

Chris Natoli

Hi Chris,

Attached is a .pdf of the Master Title Plat for the subject area, which (using the attached map with aerial photography and PLSS and land tenure data) is within lots 19 and 20 (within the NE¼NE¼), sec. 1, T. 11 N., R. 16 E., B.M. The Master Title Plat shows that these lots are private property. Such is also reflected in the PLSS and land tenure data, except the PLSS and land tenure data have not been updated to depict the new lotting that occurred when Thompson Creek Mining Company obtained patent to the property.
