Subject: Water Right Permit No. 63-33085

Kay,

Please find this email as a summary of our phone conversation this morning. I am objecting to how the place of use was applied on my lot for the 1 acre of water right including having to submit an amendment with associated \$50 fee. When I prepared the permit application, it was my intention to apply the 0.5 acre domestic water right that comes with the house on the portion of my lot in the SESE quarter corner. That way, the 1.0 acre in the permit application could be applied to the rest of my lot on NESE quarter corner. Please license my water right accordingly. Call with any questions @ 859-2932.
