Kay,

Both wells had a 5hp 40gpm pump installed. I don't have any other information other than what is on the driller's report.

Subject: Wells for Country Corners Camp Ground

Hi, Sherry.

I just did a field exam for Country Corners RV Park in Caldwell and need some information. The wells were drilled in 1998 and have submersible pumps in them. I was wondering if Treasure Valley might have any information on the pumps that were put in the wells. The camp ground has changed ownership 3 times and the current owners don't have any information. I have scanned and attached copies of the well logs for your information. If you have any information that might help me with their water rights, I would certainly appreciate any information you could provide. Thanks!
