Re: Permit No. 63-12454

Dear Mr. and Mrs. Clark:

I have calculated the acres found to be irrigated on your property. Enclosed is an aerial photo showing the areas used in my calculations for your information. If you find that I have included areas that should not be included, please indicate the changes on the map and return it to me. As we discussed during our visit to your property, the permit limits the irrigation to 2.4 acres. Please note that the permit condition states "This right does not provide for irrigation of common areas". I came up with a total of 3.3 acres which exceeds the allowable amount of your permit. You either need to reduce the area irrigated or file an additional application to cover the additional area. You may want to consider filing the additional application for all the area outside the grassy areas between the RV sites to make sure your use is covered.

I am also enclosing an "Assignment of Permit" form for signature in the presence of a notary in case you can locate a member of Crossroads Enterprises, Inc. and get them to assign the permit to you.

I contacted the well driller, Treasure Valley Drilling and Pump, and they stated that each well has a 5 horse power pump installed, capable of 40 gallons per minute each. If you find other information in your records, it may be helpful in preparing your license.

If you have any questions regarding this matter, please do not hesitate to contact me. I will be out of the office at the end of this week but will return your call if you leave me a phone message.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
