

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 63-33444

1. Name of applicant(s) Beckman Estates, LLC Phone 208-331-1800
 c/o Bruce Smith, Name connector (check one): ☐ and ☐ or ☒ and/or
 Mailing address: Moore Smith Buxton & Turke, 950 W. Bannock St., Ste 520 City Boise
 State ID Zip 83702-6118 Email: _____

2. Source of water supply Ground Water which is a tributary of _____

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
5N	1E	29			SW	NE	Ada	Ground Water	

4. Water will be used for the following purposes:

Amount 0.18 for Irrigation purposes from 3/1 to 11/15 (both dates inclusive)
 (cfs or acre-feet per year)

Amount 0.04 for Domestic purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)

Amount 0.02 for Stockwater purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 0.24 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. Proposed well, pump, sprinkler and drip
Irrigation

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.

For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No

c. Proposed well diameter is 6 - 8 inches; proposed depth of well is 600 feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No

e. If well is already drilled, when? _____; drilling firm _____;
 Well was drilled for (well owner) _____; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. Up to 5 horses

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

d. Domestic; show number of households One

e. Other; describe fully. _____

RECEIVED

NOV 02 2010

8. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
5N	1E	29		1	9														10

Total number of acres to be irrigated: 9 acres w/i 10-acre permissible place of use

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? None

10. a. Who owns the property at the point of diversion? Applicants
- b. Who owns the land to be irrigated or place of use? Applicants
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

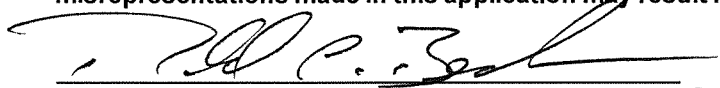

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Place of use also known as Lot 2, Beckman Estates Subdivision.

Water bearing zone to be appropriated is from 200 to 600 feet.

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Subject: Application for Permit Nos. 63-33441 through 63-33444

Dear Kay,

Applications for permits 63-33441, 63-33442, 63-33443, and 63-33444 each propose diversion of groundwater for domestic, irrigation, and stockwater purposes. Application 63-33441 proposes diversion of 0.40 cfs, and an irrigated area of 19.5 acres. Applications 63-33442, 63-33443, and 63-33444 each propose diversion of 0.24 cfs, with proposed irrigated areas of 10 acres under each permit. Beckman Estates LLC is the applicant.

Your letter of April 18, 2011 asked for additional information related to Applications for Permit 63-33438 through 63-33444. These seven applications seek to appropriate groundwater for domestic, irrigation, and stockwater purposes for lands located north of the City of Eagle, in the north ½ of Section 29, T5N, R1E (Figure 1). The applications, in combination, propose a total diversion rate of 1.66 cfs for irrigation, domestic, and stockwater uses. Proposed irrigated area is 67.5 acres. All seven applications have identical priority dates.

Specifically, your letter stated the following.

"Each of these applications is located within Basin 63, above Star, where shallow ground water is tributary to the Boise River. Although these proposals are for deep wells we have concerns about water availability. Each of the applications by itself is not for a large amount of water, however, the cumulative amount of water when they are all considered is large enough that we need to have information to show that water is available for these proposals and that they will not injure senior rights in the area."

Groundwater development experience in the area demonstrates that local wells are capable of producing the rates and volumes sought by the applications. However, it is not immediately clear that sustained pumping under new rights can be accomplished without injury to existing water rights. Potential for injury is discussed in more detail in the following paragraphs.

Existing Groundwater Development. The applications seek to appropriate groundwater in an area of numerous wells with new and on-going groundwater development. The extent of existing groundwater development provides some perspective on the magnitude of the proposed appropriations.

Within an approximate half-mile radius of the proposed points of diversion under Applications 63-33441 through 63-33444, 61 water rights listing ground water as a source were found; 44 for irrigation use and 17 for domestic and/or stock water uses. A summary of the water rights and their diversion locations are included in Attachment A.

Within all of Section 29, there are 67 decreed and licensed water rights, nine permits, and seven applications. The authorized diversion rates under approved permits and decreed and licensed water rights total 5.27 cfs. The seven applications propose an approximate 31 percent increase in the authorized diversion rate for all recorded water rights within Section 29.

Well Driller's Reports for 75 domestic wells, 3 irrigation wells, 1 monitoring well and 1 injection well were found within the section quarter-quarters of the half-mile radii. Well depths range between 94 and 1,117 feet. Static water levels range from 30 to 625 feet. A summary of the Well Driller's Reports and their locations are included in Attachment B.

Recent Permit Approvals. IDWR has issued new water right permits in this area in recent years. Specifically, within Section 29, the following water right permits were approved:

- a. 63-33380 – 5/11/10 application date, 1/11/2011 approval
- b. 63-33407 – 8/10/10 application date, 2/3/2011 approval
- c. 63-33408 – 8/11/2010 application date, 2/3/11 approval
- d. 63-33469 – 1/14/11 application date, 7/20/11 approval

The applications above were approved without protest or hearing.

More regionally, IDWR has approved applications for permits (63-32089, 63-32090 and 63-32573) in the north Ada County area for City of Eagle and M3 in recent years. These permits, in combination, contemplate development of several thousand acre feet annually. The seven applications that are the subject of your April 18, 2011 letter propose development of only a very small fraction of the volume proposed by these permits. Approval of the Eagle permits are an indication that groundwater is available for development in the area northwest of Eagle. The highly contested hearings for these permits included extensive testimony related to groundwater availability and aquifer conditions.

Water Level Trends. The Idaho Department of Water Resources hydrology section was contacted to obtain water-level hydrographs for wells currently monitored by the Department in the vicinity of Section 29. Appendix C is a compilation of 22 hydrographs provided by Dennis Owsley (email communication, September 8, 2011). The graphs have relatively short periods of record, typically beginning in 2008 or 2009. These graphs show generally stable water levels. All of the wells have annual fluctuations.

Historically, ground-water levels in the Eagle area have not shown significant response to groundwater development. Specifically, deep aquifers tapped by municipal wells located south of Beacon Light Road have shown little impact even with significant development (several thousand acre feet annually) over the past 15 years.

CONCLUSIONS

1. The seven applications, in combination, seek development of a total of 67.5 acres of new irrigation, and potential consumptive use of approximately 200 acre feet annually. This irrigation development represents a potential increase of approximately 31 percent over current authorized irrigation water use in Section 29.
2. In comparison to potential volumes proposed for development by municipal water right permits to the south and west, the potential volumes under these applications are relatively minor.
3. In recent years, ground-water levels in the area have been relatively stable.
4. It is not known whether the seven applications can be fully developed without causing water-level decline. Some water-level decline can be tolerated without injury. However, significant (i.e., many feet) or chronic water-level decline (steady annual decline) would signal injury.
5. If water-level declines occur, permits could be curtailed.

Recommendation

1. Water right permits 63-33441, 63-33442, 63-33443, and 63-33444 should be approved.
2. Water right permits 63-33441, 63-33442, 63-33443, and 63-33444 should be licensed contingent upon a successful showing that development of the permits has not caused injury to existing water rights. A successful showing of no injury would include the following components.
 - a. Water levels in local wells should continue to be monitored during the permit development period and afterward to track future water-level trends.
 - b. Annual pumping volume or irrigated area under the permits should be monitored and reported.
 - c. An analysis should be conducted following proof of beneficial use to determine whether the pumping under the permits has caused injury of existing water rights. The analysis would examine whether local water levels have declined or are trending downward in response to increased pumping. The findings of the analysis could be (1) injury, (2) no injury, or (3) insufficient data. In the case of injury, development under the permits could be curtailed. In the case of no injury, the permits can be licensed without any additional conditions. In the case of insufficient data, the permit holder could continue to pump in order to develop adequate information prior to licensing of the permits.

Please let us know if further information is needed for processing this application. Thanks Kay.

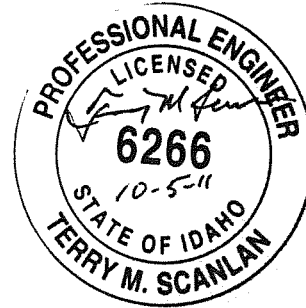

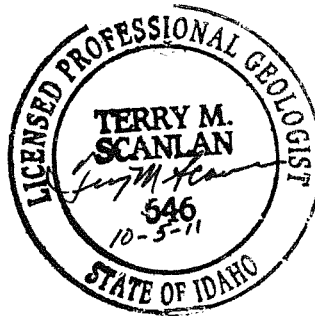

Sincerely,

Lori Graves
Water Rights Specialist

May 17, 2011

Roxanne:

We can interrupt processing of the above applications for up to six months pursuant to your request. Please consider this e-mail notice that you must submit the information requested before the end of this 6-month period. If you have any questions in regard to this matter, please do not hesitate to contact me.

Sincerely,

Kay Walker
Sr. Water Resource Agent
Idaho Dept. of Water Resources

To: Walker, Kay
Subject: applications 63-33438, 63-33439, 63-33440 through 63-33444

Kay,

We spoke last week about these, and provided some additional information at that time. Unfortunately, we cannot provide the additional information concerning the effect of these proposed uses on existing senior right holders until June or July this year. Please consider this email a request to delay processing at this time. Also, please let us know if this email is sufficient notice to IDWR to delay processing.

Thank you.

Subject: Applications for Permit 63-33438, 63-33439, 63-33441, 63-33444

Dear Kay,

In response to your letter dated April 18, 2011, we are happy to provide the following information in support of the following applications:

- Application 63-33438 – Check No. 2841 for \$125 well upgrade fee.
- Application 63-33439 – Check No. 1004 for \$125 well upgrade fee.
- Application 63-33441 – Domestic use is proposed in the NWNE and Stockwater use is proposed in the NWNE and SWNE Section 29 T5N R1E.
- Application 63-33444 – Domestic use is proposed in the SWNE and Stockwater use is proposed in the NWNE and SWNE Section 29 T5N R1E.

As indicated in Roxanne's letter, our response to your questions concerning sufficiency of water supply and effects on senior water rights in the area will be submitted separately.

Sincerely,

Lori Graves
Water Rights Specialist

RE: Applications for Permit 63-33438 through 63-33444

Dear Lori:

We are in the process of reviewing the above applications for permit and find we almost have enough information to advertise them.

Each of these applications is located within Basin 63, above Star, where shallow ground water is tributary to the Boise River. Although these proposals are for deep wells we have concerns about water availability. Each of the applications by itself is not for a large amount of water, however, the cumulative amount of water when they are all considered is large enough that we need to have information to show that water is available for these proposals and that they will not injure senior rights in the area. We will not hold up processing pending submittal of this information but would request it be submitted prior to the protest deadline.

Application 63-33438 – Ed &/or Jan Camp

This application is for an existing well under Well Tag D0025193. We need to know what the water bearing zone to be appropriated is. We will also require an upgrade fee to change the domestic status of the well to irrigation use. An upgrade fee of \$125.00 is required.

Application 63-33439 – William M. &/or Lauren J. Dale

This application also lists an existing well but you stated you could not locate a well log. We believe we have found the log for this well. It is found under Well Tag D0025850. It lists the correct lot and block for Highlander Estates however, the written location is not correct. The legal on the log is "NWSW, S20, T5N, R1E", which would be in the section just north of the correct location. Unless we receive something from you that determines this well log does not pertain, we will assume the lot and block description is correct. The only way it can be determined is to verify the well tag number located on the well. This well was also drilled under a domestic drilling permit so we will need to

have a \$125.00 upgrade fee before the well can be used for irrigation purposes. We also need to know what the water bearing zone to be appropriated is.

Application 63-33440 – Dale Family Trust

No additional information needed.

Application 63-33441 – Beckman Estates, LLC (Lot 1)

We would like you to pinpoint where the domestic and stockwater uses will be located since the place of use falls into two 40 acre tracts.

Application 63-33442 – Beckman Estates, LLC (Lot 4)

No additional information needed.

Application 63-33443 – Beckman Estates, LLC (Lot 3)

No additional information needed.

Application 63-33444 – Beckman Estates, LLC (Lot 2)

This application also falls within two 40 acre tracts. Please indicate where the domestic and stockwater uses will be located.

Please submit the information needed for each of the individual applications within the next 30 days for processing to continue. We also request information concerning water availability be submitted, before the protest deadline, for final action to occur. The applicants may seek additional time to provide the information by making a written request to delay or interrupt processing. A response including the requested information, or a request for more time to seek the information, must be received within this time period. The applications will be voided without a timely written reply.

If you have any questions concerning this matter, please do not hesitate to contact our office. Thank you for your attention to these matters.

Sincerely,

KAY WALKER

Subject: Applications for Permit (4)

Dear Steve,

Enclosed on behalf of Beckman Estates, LLC are four Applications for Permit; each proposing irrigation, domestic and stockwater use from a proposed well for separate lots.

Check No. 101 for \$1,000 is enclosed for the filing fees (\$250/application). Please let me know if there are any questions. Thanks Steve.

Sincerely,

Lori Graves
Water Rights Specialist
