Re: Error in Field Exam Report

Field examination report incorrectly lists the POU in section 25 as being in the NWNW. The examiners map indicates location is in SWNW. Based on the fact that the section 25 POU was permitted in the SWNW and that POD is in the SWNW and that BLM does not own the property in the NWNW section 25, it seems pretty clear that the map correctly describes the POU location.

No diversion volume combine use limit:

There is no diversion volume on 74-13860 so no combine use limit on diversion volume.
