RE: Permit No. 29-13784

Dear Permit Holders:

The Department of Water Resources sent you an Application for Amendment form on November 17, 2007, for the above referenced Permit. The amendment is required because the field examiner who verified the water use established in connection with your permit reported that your established points of diversion differ from the locations authorized in your permit. As of this date, the Department has received the required fee but has not received a signed Application for Amendment form.

You have asked several questions about a condition on your permit which gives you notice that a measuring device may be required on the diversion at some point in the future. IDWR publishes minimum acceptable standards for measuring devices. These guidelines are useful for understanding water district water measurement requirements. They can be found on IDWR's website at this link.

<http://www.idwr.idaho.gov/WaterManagement/WaterMeasurement/PDFs/MinAccepStand.pdf>

The file 29-13784 has been populated with IDWR's review materials and the submittals you have provided up to this date. The file documents have been scanned so that you may access and review the contents through a website query. You may also visit IDWR at 322 East Front Street, Boise, Idaho to review the contents of the file.

If IDWR does not receive the amendment before December 17, 2011, I will assume you are no longer interested in obtaining a water right license, and the amendment fee you submitted will be refunded and your permit will be voided. In case the amendment form IDWR sent you has been misplaced, a new one is enclosed.

Sincerely,

A handwritten signature in black ink, appearing to read "Shelley W. Keen". The signature is fluid and cursive, with the first name "Shelley" being the most prominent part.

Shelley W. Keen
