RE: Transfers 76136 & 77102 (irrigation/surface water diversions)

Dear Mr. Dewsnap:

The two transfers have gone through the advertising process and are ready to be approved. As I previously mentioned, however, we need a land list and map showing where the 4227.3 acres within the 4907.4 ac PPU will be located.

I have attempted to show the currently irrigated acres on the enclosed map in order to help with this process. The area outlined in the heavy yellow border depicts the squared off place of use showing the entire 4907.4 acres. The white cross-hatched area is where I tried to outline the actual irrigated acres within. I took out corners and areas that I didn't think were irrigated. (I also removed the feedlot area and proposed dairy site that were approved in two previous transfers, and the 160 in Section 8 that is owned by another party.) Evidently there are more acres under irrigation than I show because the white area equals 4158.8 acres. You are entitled to irrigate 4227.3 acres per year so that means I have taken out about 68.5 acres too many.

Please look over the map and perhaps make any corrections, deletions or additions, so we can move forward on the final process and approve these two transfers. If I do not hear from you by October 21, 2011, this is what we will approve.

If you have questions or would like to set up an appointment to go over this, feel free to contact me at the office.

Sincerely,

Jeanie Robertson
Senior Water Resource Agent
