RE: Water Right Permit No. 36-8530 & 36-8481

Dear Mr. De Kruyf:

As we discussed on October 21, 2011, our office has recently started the process of licensing permits 36-8530 and 36-8481. During our discussion you indicated that the two wells that service the dairy operation (36-8530) and the well that services the heifer facility (36-8481) are an interconnected system. Since the two facilities are serviced by all three of the wells, permit 36-8481 and 36-8530 should be amended to reflect the actual water use of the entire system.

Our office has drafted two Applications for Amendment that indicates the changes that will correct the permits. The amendments will add the two wells described in the NENE of SEC 4 TWP 09S RGE 16E to permit 36-8481 and also add the well described in SESE of SEC 33 TWP 08S RGE 16E to permit 36-8530.

The enclosed Applications for Amendment depict the water rights as they will appear on the licenses when they are issued. Please review the amendment forms carefully. If you have any questions please feel free to call me. Otherwise, please sign the Applications for Amendment and return it with a \$100.00 filing fee per amendment.

In closing a total of \$200.00 for filing fees will need to be submitted along with the signed Applications for Amendment.

Again, if you have any questions or need further assistance, please call me at 208-736-3033.

Sincerely,

Jana Reeder
Water Resource Agent
