Re: request to delay licensing

I got a phone call from Kay Walker IDWR western region. She is working through the catalog of all of the Simplot water rights. She believes that she can secure the water that would have been appropriated through this right, through one or more of Simplot's other rights. As a result it may be more appropriate to void this permit.

She has also discussed this option with Shelley Keen, who has advised me on how to handle the wastewater application requested by this right. I am willing to delay licensing this permit until I hear back from Kay.
