Subject: Application for Transfer

Enclosed on behalf of our client, The Church of Jesus Christ of Latter Day Saints, is an application for transfer involving 72 water rights appurtenant to the Oakley Stake Welfare Church Farm. The application proposes changes to the points of diversion and places of use for these rights by creating a permissible place of use and by including all of the points of diversion on all of the rights as appropriate for an integrated irrigation system. All of the rights have been decreed by the SRBA court, are for irrigation use, and have a ground water source.

The rights list a total of 26 points of diversion (wells), which are all existing. No new wells are proposed.

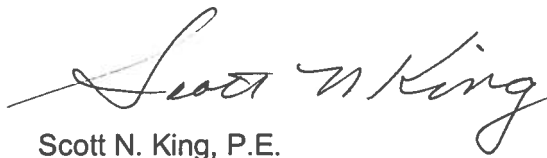

The changes in point of diversion proposed in the application simply amount to listing all of the points of diversion on all of the rights as is typical for a permissible place of use transfer. An ESPA analysis of this change is not warranted as there are no actual changes to analyze. New wells are not proposed. Pumping capacities are limited by well capacity and pumping equipment so that quantities diverted do not exceed limits already imposed by the existing water rights.

Surface water delivered by Southwest Irrigation District provides a supplemental supply when it is available. Attachment 7a-2, a map of the irrigation system, identifies the location of the three pumping stations diverting from SWID's canal. The water rights changed by this transfer application remain *primary* ground water rights.

Enclosed is a check for \$4,900 for IDWR's fees for this application. Please contact me if you have any questions for need further information.

Sincerely,

August 26, 2011

A handwritten signature in black ink, reading "Scott N. King". The signature is fluid and cursive, with the first name "Scott" and last name "King" clearly legible, and "N." as a middle initial.
