Re Application for Permit No. 65-23467

Dear Mr. Woods,

The Application for Permit No. 65-23467 that you submitted on September 9, 2011, has been assigned to me for review and processing. I sent you an e-mail this morning regarding a deficiency on the map attached to the application that must be corrected before processing continues. However, since then I noticed another deficiency that must be corrected. The application must be filled out completely with all questions answered. These are the deficiencies in the application:

1. Application item no. 6d, which asks if ground water with a temperature of greater than 85 degrees F is sought, was not answered.
2. The application specifies in item 13 that a map identifying the place of use and point of diversion is required. However, the map attached to the application you submitted does not designate the location of the point of diversion, in this case, a proposed well.

Please call me by November 28, 2011, to set an appointment to complete the original application. The application will be voided or rejected without a timely written response. Fees are not refunded for voided applications. I can be reached at 208.334.2190. Thank you.

Sincerely,

Vicky Music
Sr. Water Resource Agent
