RE: *Application for Amendment for Licensing Purposes for Water Right Permit No. 21-7593, and Request for Withdrawal of Proof of Beneficial Use for Permit No. 21-13053 and Request for Extension of Time to Submit Proof of Beneficial Use for Permit No. 21-13053.*

Dear Cherie:

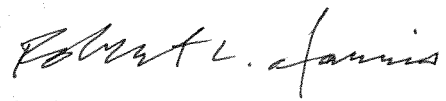

Enclosed for processing is the *Application for Amendment for Licensing Purposes for Water Right No. 21-7593*. I apologize for my delay in getting this back to you. I had been reviewing information relative to the other permit that needs to be licensed on this water system, Permit No. 21-13053, and wanted to have the documents submitted in a single package.

We request that the *Application for Amendment for Licensing Purposes for Water Right No. 21-7593* be processed. With regards to Permit No. 21-13053, however, we request that proof of beneficial use field report that we previously submitted be withdrawn at this time. The reason for the withdrawal was confirmed in your April 20, 2011 email, where you indicated that the Department considers a lot as being stubbed in when it is equipped from a line to the lot from the main line that can readily be switched on to provide water to a home. At this time, there are water lines that have been run into the middle of the streets for all of the particular property to be serviced by 21-13053, but lines have not been run to each individual lot. We understood the Department's standard to be access to a line, not an actual line running from the main line to each individual lot. As such, we hope that the economy will improve in the next five years in order for us to have each of those lines stubbed in and in order to submit proof of beneficial use for Permit No. 21-13053.

If you have any questions or concerns regarding the above, please let me know. We appreciate your attention to this matter.
