RE: Water Right Permit No. 29-13155

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 X Point(s) of Diversion

 Place(s) of Use

Only one of the points-of-diversion on the permit is correct. Both springs have been found to be located within the same ten-acre tract which is the NE1/4SW1/4SW1/4. The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. A processing fee of \$50.00 is required to make the change. Please review the amendment form carefully.

As I understand your system, the same diversion and distribution piping serves two rights 29-13155 (power use) and 29-13784 (domestic use). Because they appear to share the system, a condition which defines that sharing and their combined use will be placed on the license. If the two rights are not on the same piping, cross out or draw a line through condition 8 and describe the true water routing. Please sign the form and return it with the \$50.00 filing fee within 14 days.

If you have any questions, please call me at 208-287-4946.

Sincerely,

Michele Edl
Associate Engineer
