**RE: Contested Application for Permit #67-15030
Additional Information**

Dear Applicants and Mr. King:

Our previous Department letters of 07/14/2010 and 02/15/2011 requested additional information for the above described contested application for permit. Both letters requested information that addressed the Watermaster's concerns regarding the conveyance capacity of the Grays Creek Ditch. Mr. King's 05/31/11 response letter indicated that the applicant had performed maintenance on the ditch, but there had not been water demand yet to warrant the ditch to be operated at capacity. When the ditch was at capacity, flow measurements would be made and forwarded to the Department.

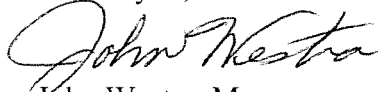

Please present the following data/information to parties at the November 2, 2011 prehearing conference:

-Conveyance capacity of Grays Creek Ditch—flow measurement

-Analyze water right flow totals verses current ditch flow capacities—if capacity is deficient, what modifications/changes are required to meet the 1.79 cfs additional capacity. Refer to the license field exam on water right #67-7866.

Should you have questions, please contact me at the Western Regional Office, phone 334-2190.

Thank you,

John Westra, Manager
