Subject: Stanharrah transfer

To supplement the application submitted under date of 7/25/11, Part 1, section 5(f), I am informed that subsequent to the residence being disabled, the well was then used to supply water to a mobile home occupied by a member of the maintenance staff. That use continued to within the past five years.

I am informed that Harrah wells numbered 19, 17 and 12, being water rights numbered 71-7109 and 71-7143, respectively, are tied together and monitored through a pump-house located at well No. 12. The water from the wells supply 61 motel rooms; a 150 seat restaurant, 10 RV spaces and a residence used during the Summer and located adjacent to well 19. Applicant requests that wells numbered 19, 17, and 12 be added as authorized points of diversion for right 71-7109 on the application submitted on 7/25/2011.

The RV park is located within 10N 13E 3 SWSW; 10N 13E 3 SESW; 10N 13E 10 NENW; 10N 13E 10 NWNW. Applicant requests that the foregoing be an authorized place of use for right 71-7109 on the application submitted on 7/25/2011.

Under separate cover, I am sending you a map show the locations of well 19, 17 and 12 as precisely as we can. The locations of each is depicted with a red dot. I have also labeled the lodge, restaurant and RV park.

The dormitory buildings, which are just off the aerial map, are shown in the upper right hand corner of the map which is their approximate location. The buildings are referred to as "sulphur flats". They are served by wells 12, 17 and 19.

Regarding wells 6, 7, 13 and 15, The maintenance building and shop and homes are labeled on the map. The maintenance building and shop is served by well 15. A home is served by well 6, as shown on the map. Two homes are served by well 7 as shown on the map. Well 13 is not in use.

The store is served by well 9. The office (contains two separate offices but I wouldn't call it a complex and also, there are no shops in the two offices) and gas station and service center (which is just the garage that is part of the gas station) is served by well 8. Well 18 is not in use.

I hope I have provided all the information you have requested. If not, please let me know.

Sincerely

Gary Nelson
Sec/Treas of Stanharrah Corporation
