

MEMORANDUM

Date: October 12, 2011
To: Water Right File 37-8502
From: csaxton
Re: Domestic Div Rate

Spoke with Charles G. Brockway on 10-12-11 concerning domestic diversion rate listed on the permit amendment for 37-8502. He felt the diversion rate should be 0.06 cfs rather than 0.02 cfs since the system had the capacity and demands 0.06 cfs. Permit 37-8502 was permitted for 0.06 cfs for domestic uses. The permit lists domestic use as 1 home and 1 guest house. Per application processing Memo 22, page 3, the standard diversion rate recommendation for internal use for 2 homes is 0.06 cfs. The field examiner found domestic use for 1 home and care takers residence. Recommend 0.06 cfs for domestic diversion rate.
