Subject: Field verification for permits 63-33085, 63-33086, and 63-33087

The three permits listed above are associated with the Willow Cr Ranch Estates subdivision. 63-33085 is for irrigation of Justin Walker's lot. The other two are for the common areas associated with the subdivision.

As they are all in the same location, I would like to schedule a time to do them together. The verification should not take long as based upon currently available information, all that is lacking to complete the exam is to GPS the well locations, confirm that the irrigation shown on the aerial photography is correct, and determine the pumping capacity of the wells. This likely could be accomplished by using a theoretical calculation based upon the specific pump data. (Hp, Pumping pressure, dynamic water level in well, and etc.)

I am available Wed Oct 12 and Fri Oct 14 next week and any day but Wed Oct 19 for the week of Oct 17 thru the 21st. It is not a requirement that the exams be done within the next two weeks but I would like to move forward toward licensing the permits.

Please let me know if there is a common date that would be acceptable.

You can reach me at the number below if you want to discuss this in greater detail.
