Re: Water Right Permit # 11-07390

Dear Cody,

Thank you again for meeting with us on September 22, 2011 at Camp Bartlett to help to bring closure to our open permits. I was told by James Cefalo that Trapper Trails Council needed to file a request to reinstate a permit lapsed more than 60 days (because the permit lapsed 15 years ago), and that we needed to submit a statement of completion for the project in order for a license to be issued.

To address these requests, we have done the following:

- On September 23, 2011, Trapper Trails Council hired Paul Scoresby, MS, PE of Schiess & Associates, headquartered out of Idaho Falls to conduct a Beneficial Use Field Report for the project. Mr. Scoresby is a State of Idaho certified water right examiner
- A field examination of the project by Mr. Scoresby was completed on October 1, 2011 at Camp Bartlett, and he is in the process of completing the report.

In the next few weeks, we will be submitting the request to reinstate a permit lapsed more than 60 days with the following:

- A prepared statement from the certified water right examiner,
- The statement of completion for submitting proof of beneficial use,
- The \$250.00 fee for reinstatement of the permit, and
- The \$100.00 fee for statement of completion for submitting proof of beneficial use

Please let me know what else is required regarding this specific permit number.

Sincerely,

Josh Naacke
Director of Support Services
