

MEMORANDUM

TO: Transfer No. 77393
FROM: Sharla
DATE: September 29, 2011
RE: Evaluation of Application

The transfer proposes to consolidate the points of diversion at the Boise Bench Substation to one well. The site is approximately $\frac{3}{4}$ of a mile east of the intersection of Amity Rd with Federal Way.

Deviations from Transfer Policy Standards

Because this transfer application proposes only to consolidate the points of diversion at the Boise Bench Substation to one well, this transfer will not be advertised.

Summary of Information Submitted

Authority to File: Applicant is the right holder of record for all 3 rights included in the transfer and is therefore authorized to file the transfer application.

Water Right Validity: Rights presumed to be valid because the partial decrees were issued within the past five year period.

Injury to Other Water Rights: None anticipated.

Enlargement of Use: No enlargement is proposed; diversion rates, diversion volumes and consumptive use volumes will not be affected by the transfer. The only parameter being changed by the transfer is the consolidation to one point of diversion.

Local Public Interest: It would seem to be within the local public interest to maintain a neat appearance around the power substation and to provide a cooling source if the municipal supply is interrupted.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Data entry affected the correct records. Partial decrees were previously migrated to water right records.

Summary

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

Condition 046 N/A since a new well is not to be drilled. It's marked as a "new pod" on the map, however, it is an existing well; just considered new for the rights listed in the transfer that are now going to utilize it.
