Application for permit proposes to divert 0.3 cfs for irrigation and stockwater use from an existing well located approximately 16.9 mi. south and 6.4 mi. east of Stanley. The existing well will divert the water into an existing pond where the water will be pumped into an irrigation system to irrigate 15 acres within a 160 acre permissible place of use. This application proposes the diversion and use of water tributary to the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate of 0.3 cfs and 15 acres will be applied to the subordination amounts specified in the decree for the Salmon Wild & Scenic River.
