Subject: RE: Permit 37-7033 (& 37-22574): WMIS# 700081

Craig, there has never been a device on that well as far as I know. An updated PCC was developed in 2010, and the system was measured also in 2006 and 2009 with a high recorded flow of 1191 in 2009. As watermaster I would not recommend that the device condition be dropped, but I would support changing it to 213 or whatever allows use of pcc in lieu of measurement (I can never remember). I can always order a flowmeter if I decide one is necessary.

By the way, the WMIS point appears to be correlated on the wrong spatial point. I am going to move it over to where you have the draft license pod. This appears to be the correct location. If you move the pod from there please recorrelate the WMIS point too, if you can, or ask me or Corbin and we will do it. Thanks.

Subject: Permit 37-7033 (& 37-22574): WMIS# 700081

Hey Cindy,

I am digging through the backlog and am trying to issue a license for 37-7033. There is a measuring device requirement on the permit. I found the well on the WMIS and see that it looks like they are getting measurement using power meters.

It does look like that field data was from 2003 so I thought I would check and see if you could confirm or deny the existence of a measuring device on that point of diversion?

Thanks,
Craig
