Subject: Lilac 3 Application

Bryce,

The Lilac 3 application (for the pond up the East Fork of the Salmon) came in the mail today. I noticed that the second page, with the signatures, is a faxed copy. The following is IDWR's guidance regarding faxed signatures on applications for permit...

If an application for permit or transfer is faxed to the Department, and the application is otherwise complete and fees have been paid, then the Department should consider the application to be filed as of the date of the fax, provided the original document is submitted in a timely manner. For those applications, the Department should follow up, probably by phone, to seek the original documents to complete the submittal. If the originals are not submitted, the Department should ask, in writing, for the original documents (pursuant to 42-204, additional information requirements for permits) and provide 30 days for submittal. The Department could void or reject the faxed application as appropriate.

In summary, we will need the original signature page (in particular the original signatures) for the application. Please submit this as soon as you can.

Thanks,

Corey
