RE: Revised RAFN Evaluation for the City of Eagle in Connection w/ Application for Permit 63-32573

Dear Mr. Smith,

In the course of deposition it came to the Idaho Department of Water Resources (Department) attention that an error had been made in the forecast population for the M3 Eagle Development (M3) at the end of the planning horizon, i.e. year 30. Regarding M3's population forecast numbers the Department utilized the projected numbers provided by M3 and simply lagged the start of the development by five years to 2016. In so doing the population number used by the Department at the end of the planning horizon was simply the number provided by M3 for the 25th year of build out. The Department transposed a digit in this number using the value 16,254 instead of the number of 16,524 prepared by M3.

In correcting the population value the Department arrived at a different value for the total water demand associated with M3 (22.42 cfs) and the City of Eagle (25.50 cfs) at the end of the planning horizon. The *RAFN Evaluation for the City of Eagle in Connection with Application for Permit 63-32573* (RAFN Evaluation) document dated June 1, 2011 has been updated to reflect the corrections described herein. The revised RAFN Evaluation document is attached with this letter.

If you have any questions please contact John Homan or Mathew Weaver at (208) 342-4800.

Sincerely,

Mathew Weaver, PE
Staff Engineer
