RE: Permit 75-13989

NOTICE OF INTENT TO VOID PERMIT

Dear Permit Holders:

The Idaho Department of Water Resources (IDWR) has received your correspondence in order to reconcile the use of water that was developed in connection with permit 75-13989. A building permit for a seasonal cabin, a receipt for plumbing supplies and a cashed check for those supplies dated October 31, 2006 were included in your answer to my previous letter that requested proof that water use had occurred within the authorized development period of July 5, 2001 to June 15, 2006.

Your attempt in proving that the permit was developed within the authorized development period is appreciated; however, the evidence that was provided did not demonstrate water use in the timeline in question. At this time IDWR wants to give you another opportunity to submit something that demonstrates that water was used from the authorized point of diversion in the spring for domestic and/or stockwater uses. The development period was between **July 5, 2001 to June 15, 2006** and any evidence that you submit must be within that timeline.

Information that you submit may include affidavits from neighbors or any other uninterested party that attest that you have used water from the spring, dated photographs that show water use from the spring, or receipts for the diversion works from the spring. Please submit the requested information within **30 days**. If the information is not submitted in a timely matter or is insufficient, IDWR will take action to void your permit and a new application will need to be filed with IDWR to cover your current uses from the spring.

If you cannot provide sufficient information, you may complete the enclosed relinquishment of permit form to dispose of your permit. If this is the case, I have enclosed an Application for Permit form for your use.
