3. csaxton 9/21/2011 Water Master Regulation
Comment: This right was originally permitted as 73-7113 with the source of ground water. It was later determined that one of the wells actually drew water from the Pahsimeroi. 73-7113 was split into two parts. The intent of the split was to create a separate right for the well that directly affects the flow of the Pahsimeroi when pumped, identifying the source as Ground Water trib to the Pahsimeroi. This well is to be regulated with surface water rights and fall under watermaster control. Because of this I am adding the 01M condition requiring a measuring device upon specific notification and R05 identifying this right as being regulated by the watermaster.

4. csaxton 9/21/2011 Split Right
Comment: Right 73-7113 split into 73-12171 and 73-12172.
