RE: Transfer application # 77478

Dear Mr. Adams:

Please see the enclosed (amended) transfer application, per our telephone discussion. This form is a short form transfer application, intended for a point of diversion change only.

Per my discussion with other colleagues in the office it was determined that this is the best form to use. Please sign and return if everything looks ok. In addition I discussed the additional fee requirements we had discussed. Based on my discussion with the manager, he is unwilling to waive the additional charge for the transfer.

The argument is, although the majority (if not all) of the water for 35-2207 is currently diverted from the unnamed drain, the water will now be injected into the unnamed stream. A new diversion point will be established in the unnamed stream (creating a diversion from a new source), thereby nullifying the exemption to the fee. So, in order to continue processing the transfer application I will need an additional \$160.00.

I am also enclosing a draft letter, to change the irrigated acreage we had discussed. You can use this letter and map or you can create your own. Just sign and mail, there is no charge for this correction.

If you have any questions please let me know.

Sincerely,

Kerrie Mathews
Water Resource Agent
