

MEMORANDUM

Date: September 9, 2011
To: Transfer 77503 File
From: Jana Reeder
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes changing the place of use of water right 47-52 by creating a new 605 acre permissible place of use that reflects current operation of existing pivot sprinkler systems on a farm located 8.4-9.9 miles west and 2.8-3.3 miles north of Rogerson. An existing spring located on the same farm will be used to divert 10.4 CFS and irrigate 289.5 acres in the new permissible place of use. The properties and points of diversions involved with the application are located outside the ESPA and not within a Water District.

Note, an overlap analysis found an old license (47-2058) that appears to have never been claimed in the adjudication.

After approval 26.8 acres in the NENW, NWNE and SWNE of SEC 35 13S 14E will be placed in the water bank. (see attached map in file.)

The applicant has submitted a shape of the 289.5 acre place of use within the 605 acre PPU and it is linked to the irrigation use.

- **Authority to File:**
The applicant is listed as the current owner of the water right according to IDWR records and a warranty deed was submitted with the application for the new lands to be irrigated.
- **Water Right Validity:**
Water right 47-52 was decreed on 1/26/2010.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated if conditions are implemented.
- **Local Public Interest:**
Existing system. Recommended no advertisement.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
