

MEMORANDUM

Date: September 15, 2011
To: Transfer 77459
From: ameritt
Re: review and approval

This transfer was processed in the region. The application has no hydrologic impact so was not advertised. The watermaster was provided an opportunity to review the application but did not respond so it is assumed he does not oppose approval. It is being approved out of the region as drafted.

The application was initially filed to reshape or correct the place of use and description of the existing points of diversion. This application was processed in conjunction with application for permit 72-16873. It was the intent to place a portion of the right in the Water Bank once permit 72-16873 for ground water use on a portion of the pou was approved. As an alternative to the Water Bank process it was discussed and agreed to by the applicant (see letter dated 8/25/11) that the permit be mitigated by the portion of right 72-4077 that was intended to be placed in the Water Bank for protection. The transfer approval incorporates the mitigation use and avoids the additional Water Bank process.
