Good Afternoon Dave,

I think we are close to wrapping up the Buckeye rights. Here is what we need to move forward:

Riley Creek:

36-7741: Needs amendment. Sent you copy of the amendment in the e-mail below, and am attaching the amendment again just in case.

36-8729: Needs amendment. Sent you copy of the amendment in the e-mail below, and am attaching the amendment again just in case.

36-8785: Ready to license

Buckeye Ditch – Billingsley Creek:

36-7739: Ready to License

36-8335: Ready to License

36-16382: Needs amended application for permit (attached)

Weatherby Springs:

36-7740: Ready to License

36-8728: Needs amendment (attached). I looked closer at the POU using the pond shape you sent me and it resulted in a change in the POU description where I dropped a couple of QQ's (map attached).

Curren Ditch – Billingsley Creek:

36-7742: Ready to License

36-8730: Needs amendment (attached). I looked closer at the POU using the pond shape you sent me and it resulted in a change in the POU description where I dropped a couple of QQ's (map attached).

Due to the overlapping conditions, we are holding off on issuing the licenses that are "ready to go" because they make references to other "rights" that until licensed, should be referred to as "permits". So we will do it in one big group.

Let me know if you have any questions.

Thanks,
Craig

Hey Dave,

I have updated the amendments to these Riley Creek Group rights. Take a look and if there are any issues, let me know.

Per our discussion I have attached documentation leading up to the decision to split the SOU.

36-7741: Per our conversation, I updated diversion volumes:

WR #	Process	Priority Date	Diversion Rate	SOU	# Day's	Vol Calc	3 sig fig	Volume	Source List	We
36 7741	Water Right	8/1/1977	24.00	11/16 - 3/14	119	5,665	5,670	5,700	RILEY CREEK	FIS PR
			22.45	3/15 - 11/15	246	10,954	10,900	10,900	RILEY CREEK	FIS PR
			Limits =	24.00		16,619	16,570	16,600		

Amendment paid for in 2002, but never signed. Need this amendment signed.

36-8729: Split SOU to match 36-7741 authorizing 24 cfs outside irrigation SOU and 22.45 during the irrigation SOU

No fee required for this amendment. Fee paid in 2002, but need a new amendment. By submitting the replacement amendment, I will consider the original amendment withdrawn.

Thanks,
Craig

* The reason that 36-8785 has a combine use limit for diversion rate and volume is because of the agreement to allow diversion of 24 cfs outside the irrigation SOU and the conditioned with a diversion rate limit of 38.45 cfs. That difference between the 22.45 and the 24 cfs is what is preventing 36-8785 from being totally cumulative without re
